

Lab 5 – Calculator with Totals History

CS235IM, Intermediate Mobile Application Development: iOS

Introduction

The purpose of this lab is to give you practice using a Navigation Controller and a Segue.

Modified Calculator

Modify either the Four-Function Calculator app or the Tip Calculator by adding a second screen that displays a table containing the results of each calculation. Provide a button that will display the second screen. The Navigation Controller should provide a navigation bar with a back button so that the user can return from the second screen.

Alternative lab assignment: Propose an app of your choice that uses some kind of navigational control to switch between views.

Submission:

Zip the solution folder and upload it.

Put the screen shots in a document, label each screen shot, and upload the document.
